SUMMARY

UI/UX designer with a background in IT and a master's in e-commerce (thesis on emotion analysis in Persian text). I design complex, multi-role products, from user flows and information architecture to wireframes, UI and developer handoff. I use Claude in my everyday design workflow and am growing toward product design.

EXPERIENCE

UI/UX Designer · Bilitz Agency — Dec 2025 – Sep 2026

Atelio · service marketplace with client, coordinator and specialist panels

- Sole designer for 8 months, from user flows and wireframes to final UI, with PM sign-off.
- Redesigned the shared project timeline from six stages into two goal-based stages, replacing separate approvals with one shared agreement.
- Redesigned the user profile after launch: editing moved onto the profile itself and popups were replaced with inline adding, informed by a review of LinkedIn and local job platforms.
- Wrote handoff notes for developers covering states, logic and interactions.

Nowslot · last-minute booking marketplace

- Defined the sitemap and user flows, and wireframed the business and customer panels in a two-week sprint.
- Helped narrow the first version to four business areas by reviewing which businesses the model could work for.

Project names changed under NDA.

EDUCATION

M.Sc. in Computer Engineering, E-Commerce · University of Isfahan — 2023

Thesis: Sentiment and emotion analysis in Persian text

B.Sc. in Computer Engineering, Information Technology · University of Shahrood — 2018
